

Home safety checklist

for parents and caregivers of children 0-4 years of age

Kidsafe SA Inc. | June 2019

Most injuries suffered by children occur in and around the home. Young children are vulnerable to injuries as they begin to explore their environment because they are unable to recognise danger or take action to keep themselves safe. While it may not be possible to make your home completely safe at all times, you can take steps to reduce the risk of injury and make your home a safer place for children.

Every home is different. Some items in the following checklist may not apply in your home. For more information on how to make your home safer, please contact Kidsafe SA on (08) 8161 6318 or visit the Kidsafe Centre located in the Women's and Children's Hospital – Level 1, Gilbert Building (opposite the Playdeck).

To assist parents and carers Kidsafe SA has a series of information sheets available to download from the website - www.kidsafesa.com.au
